

meet Bob.

he's a big lad.

**it's a good job he's
working on 5-ton
tested scaffolding.**

The innovative NEW 5-ton tested Tube Lock ® system as extensively used by Crossway Scaffolding, has been proven to increase safety, speed up construction and offer unrivalled flexibility.

Van Thiel Lock Transom – Features include

NO NEED for ledger bracing because of exceptionally rigid corner joint

FAST ERECTION – less tightening than conventional scaffolding

NO LOOSE fittings

SUITABLE FOR any form of building or height guarantees a stable scaffold

Extender Transom, Features include

5 BOARDS between standards

FULLY TELESCOPIC with up to 3 'inside' boards

NO NEED TO loosen fittings when adapting

ALLOWS FULL clearance when used with hop up brackets

FULLY TESTED to 3kn including full extender

As one of the leading scaffolding experts in the North,
Crossway have made a commitment to one of the most
Innovative scaffold systems in the World.
