

# ENVIRONMENTAL POLICY

---

Crossway Scaffolding (Elland) Limited recognises its responsibility towards the environment and issues this policy as a statement of its commitment to minimising the environmental impact of its' business activities.

Crossway Scaffolding (Elland) Limited is committed to ensuring effective management of all activities that have the potential to affect the environment by:

- Assess our activities and operations to identify the significant environmental aspects that have potential to impact on the environment.
- Control all significant environmental aspects.
- Act in accordance with relevant environmental legislation and regulations and to other requirements to which the organisation subscribes.
- Create awareness of our environmental management systems throughout the organisation and set and publish clear environmental objectives to monitor environmental performance.
- Build environmental considerations into the decision making process and methods of operation to promote sustainable development by conserving energy, sourcing products from sustainable sources, minimising consumption, maximising efficiency, effectively managing waste and climate change mitigation.
- To utilise, and promote the use of, recycled materials whenever possible, ensuring that materials are disposed of in an environmentally safe manner at the end of their useful life.
- To protect the environment and to exercise a positive influence within the scaffolding industry and for the clients we serve.
- Communicate this policy throughout the organisation and to all other interested parties.

This policy is maintained and reviewed at least annually to ensure that any changes in legislation are incorporated and any changes to our organisation, its scope of operations, and its working arrangements and practices are considered to ensure continued adherence to our commitment.
